

19 degree mobile battery

Overview

Most people don't think about the temperature of their Android phone's battery, but it's crucial in keeping your device running smoothly. The ideal temperature range for an Android battery is 32-45 degrees Fahrenheit. Have you ever wondered what the ideal temperature is for your Android phone's battery?

According to the manufacturer, it should be between 32 and 35 degrees Celsius. Anything above or below this range can be potenti. As we all know, battery life is one of the most important factors when purchasing a smartphone. And with the release of Android Oreo 8.0, Google has introduced a new feature called "Minimum Battery Temperature." S. Have you ever wondered what the ideal or "normal" battery temperature is while charging?

Well, according to Battery University, the recommended maximum temperature for lithium-ion batteries is 45°C (113°F), and the i. Most people don't think twice about the temperature of their mobile device's battery. But did you know that there is actually a limit to how hot or cold your battery can get?

And if you exceed these limits, it could damage your bat.
