

24v 6kW industrial frequency inverter

Overview

Rugged, heavy duty and industrial grade 3-phase pure sine wave DC/AC inverters, 24V, 48V, 125V or 250VDC inputs available. 208VAC or 380VAC or 415VAC output, 6000 watts. Pure sine wave output exactly duplicates mains power. ★ This LFP Series Pure Sine Wave Inverter is a combination of a 6000-watt inverter, battery charger, and AC auto-transfer switch. Low frequency, low Idle Current, BTS cable, remote control. ★ The split-phase inverter requires 240VAC input and can provide 120VAC or 240VAC output power for all kinds. The 6000W 24V inverter can recharge lithium batteries but also provide power with an alternating current in 220V. A 24V 6kW inverter acts as the bridge between DC power sources and your AC appliances - it's the unsung hero of renewable energy systems. Key Application Imagine this: Your solar panels generate clean energy all day, but without the right inverter, that power stays trapped like water behind a dam.
