

# A new batch of solar power projects

## Overview

Several significant solar projects were announced or progressed worldwide during October 2025, reflecting strong ongoing investment in renewable energy across key regions. Global Solar Investments Accelerate with New Projects Announced in October 2025. The first batch of wind and solar projects has a construction scale of 7 million kilowatts, which includes 2 million kilowatts of wind power and 5 million kilowatts of solar power, all aimed at supporting subsidy-free projects. The second batch of projects has a construction scale of 12. As a complement to onshore and offshore wind energy, photovoltaics and storage systems are essential for the success of the energy transition. The article highlights how the global renewable energy sector is no longer niche but mainstream, pointing to more than \$2 trillion invested in the low-carbon transition in 2024. Renewables now account for approximately 30 % of global electricity generation, then visits five major projects: Noor.
