

Black Mountain Off-Grid solar Inverter

Overview

It delivers a steady 5000W of continuous power with over 90% efficiency—making it perfect for heavy-duty off-grid needs like RVs, solar setups, and emergencies. This inverter's remote control and LCD display make monitoring simple, ensuring you catch issues early before they become. 48V Systems Dominate Large Installations: For systems above 3,000W, 48V configurations offer superior efficiency, reduced wiring costs, and lower current flow compared to 12V or 24V alternatives, making them the preferred choice for whole-house off-grid applications. All-in-One Integration. RICH SOLAR offers off-grid solar power products including solar panels, lithium batteries, inverters, charge controllers, and more to build energy independence. The off-grid inverter, often called an inverter-charger, is the heart and brain of an off-grid system.
