

Energy storage system product testing

Overview

The testing and certification process involves evaluating the safety, performance, and environmental sustainability of energy storage systems, identifying potential risks and hazards, and verifying compliance with relevant regulations and standards. The Standard covers a comprehensive review of ESS, including charging and discharging. Intertek provides comprehensive energy storage testing and certification services to help you achieve compliance, enhance product safety, and gain market acceptance. Intertek offers a full suite of testing services for energy storage systems, battery management systems (BMS), and related. Energy storage systems consist of equipment that can store energy safely and conveniently, so that companies can use the stored energy whenever needed. We deliver an extensive service portfolio that includes technical development assistance, product testing.
