

Fixed price for solar panels

Overview

Solar panel installations typically cost between \$13,962 and \$27,924 in 2026. The actual price tag depends on your home's energy needs, roof characteristics, local incentives and other factors, all of which we'll break down in this guide. However, every home has different production needs based on its size and location, and total system costs are influenced by an array of other factors. We compared research from government and solar. With the average residential solar system costing between \$20,000 and \$30,000 before incentives, and the federal 30% tax credit scheduled to step down after 2025, now is an optimal time to invest in solar energy. Compare loan, lease, and purchase options for your solar panels based on your results. 50 per watt of installed capacity (more on price per watt below). Through 2022, benchmarks were developed using bottom-up.
