

How long is the warranty period for exported photovoltaic panels

Overview

Product warranty: 25 years, covering repair, shipping, and all components of the solar system. A 10-year warranty is also offered for storage and monitoring equipment. The duration of coverage differs based on the brand and product, but the solar industry typically offers warranties of 10 years or longer. As a minimum requirement, it's advised to seek a warranty providing coverage against panel failure for at least a decade. However, the Marketwatch Guides Team. Solar panels generally come with two warranties: The product warranty covers the equipment and typically guarantees at least 10-12 years without fail, and the power or performance warranty often guarantees at least 90% production at 10 years and 80% at 25 years. Additionally, performance warranties usually guarantee that a solar panel will maintain a certain level of efficiency over. The warranty period for solar photovoltaics typically varies based on several factors, including the manufacturer and type of solar module.
