

JA Solar 325W photovoltaic panel

Overview

Assembled with multi-busbar PERC cells, the half-cell configuration of the modules offers the advantages of higher power output, better temperature-dependent performance, reduced shading effect on the energy generation, lower risk of hot spot, as well as enhanced tolerance for mechanical. Assembled with multi-busbar PERC cells, the half-cell configuration of the modules offers the advantages of higher power output, better temperature-dependent performance, reduced shading effect on the energy generation, lower risk of hot spot, as well as enhanced tolerance for mechanical. These double-glass modules assembled with bifacial PERCIUM cells have the capability of converting lights incident on their rear side into electricity on top of what is being generated by the front side, making them the best-performed and the most cost-effective modules in terms of solar energy. The JA Solar JAM60S09-325/PR panel delivers 325W. Maximum current and voltage are 9. As for physical dimensions, the panel is 1657mm tall and 996mm, wide, and weighs 18kg. com sells JA Solar Panels at the lowest cost.
