

Legal photovoltaic panel installation

Overview

Permits are required for the installation of all building-connected solar energy systems. Before installing a solar hot-water or a solar electric-generating system, also known as photovoltaics, you must hire a Professional Engineer or Registered Architect to be sure your building's structural system can maintain the weight of the equipment. What types of solar installations require a permit?

Solar panels that are connected to the plumbing, electrical, and/or structural systems of a building. NYC has some of the most detailed solar installation regulations in the country—covering everything from rooftop access for firefighters to architectural requirements in zoning districts. Understanding these rules up front will help ensure a smooth, compliant, and safe solar installation. Here's. Sustainable CUNY of the City University of New York formed the NYC Solar Partnership in 2006, working collaboratively with the NYC Mayor's Office and the New York City Economic Development Corporation to develop and implement comprehensive plans for large-scale solar integration in NYC. However, to fully benefit from their.
