

Nissan home solar power generation

Overview

The new photovoltaic system, developed entirely by Nissan, combines a 300W fixed panel with a 200W extendable section. YOKOHAMA, Japan — Nissan today announced that it will showcase a prototype vehicle equipped with an onboard solar power generation system at this month's Japan Mobility Show 2025. The Ao-Solar Extender is the concept model of a solar-system designed to be mounted on the roof of the Nissan Sakura. Its name refers to the Japanese term "Aozora," meaning "blue sky," combined with "solar panel. At the Japan Mobility Show 2025, Nissan presented one of the event's most forward-looking prototypes — the 2025. NISSAN has unveiled the Nissan Energy Home, a demonstration house that shows how electric vehicles can help provide power for a home's energy needs. Compact, silent and designed for the city, today it also becomes a small solar power plant on wheels.
