

Off-grid type mobile energy storage battery cabinet for base stations

Overview

A Site Battery Storage Cabinet is a modular energy backup unit specifically designed for telecom base stations. It houses lithium-ion batteries (typically LFP), BMS, EMS, and optional thermal management systems to ensure uninterrupted power supply in grid-limited or off-grid. Highjoule's Site Battery Storage Cabinet ensures uninterrupted power for base stations with high-efficiency, compact, and scalable energy storage. Ideal for telecom, off-grid, and emergency backup solutions. The system combines: Fuel Cell Cabinet — housing three 5 kW HT-PEM methanol fuel cells (15 kW total) Battery & Power Electronics Cabinet — with integrated. Featuring lithium-ion batteries, integrated thermal management, and smart BMS technology, these cabinets are perfect for grid-tied, off-grid, and microgrid applications. Make full use of the tower, the top of the computer room, and the idle land of the base station for component installation, and optimize the base station resources. Low-profile, space-saving design (15-50 kWh) featuring highly flexible mounting (wall-, pole- or floor-mount) to suit varying site topography.
