

Outdoor energy storage growth in Australia

Overview

The Australia Energy Storage Market is poised for substantial growth, projected to reach 15.4 billion USD by 2025, expanding at an impressive CAGR of 17. This robust expansion is primarily driven by Australia's ambitious clean energy transition goals, necessitating reliable. The Australia energy storage market, valued at 8.27 GW in 2025, has seen significant growth, driven by its ability to enhance grid stability by balancing supply and demand, thus preventing blackouts. The development of the market can be attributed to the implementation of favourable policies for supporting the renewable energy sector and accelerating the transition to a circular. Australia's solar and energy storage sectors delivered strong performance during the third quarter of 2025, with grid-scale solar generation reaching 1,699MW average output while battery storage systems expanded capacity by 2,936MW since Q3 2024.
