

Photovoltaic panel factory export tax rebate policy

Overview

Starting 1 April 2026, value-added tax (VAT) export rebates for photovoltaic (PV) products and certain other categories will be abolished. They said the decision could trigger a short-term surge in overseas orders ahead of the deadline, but would ultimately. China announced on Friday that it will change export tax rebates for a range of products, including photovoltaic and battery products. The announcement, jointly issued by the Ministry of Finance and the State Taxation Administration, said that export tax rebates for the value added tax of. China's Ministry of Finance (MOF) has announced the country will cancel export tax rebates for photovoltaic (PV) products and phosphorus chemicals starting April, and a phased elimination of export tax rebates for batteries over two years, marking a significant policy shift aimed at promoting. On 9 January 2026, China's Ministry of Finance announced a significant adjustment to its export tax rebate policy. This follows a prior reduction from 13% to 9% in December 2024. For battery products, such as lithium-ion batteries.
