

Rabat energy transition

Overview

Marrakech – Head of Government Aziz Akhannouch presided over a signing ceremony for a landmark energy agreement in Rabat on Monday. The convention aims to accelerate the provision of 5 gigawatts of green electricity to Moroccan industry by 2030. Morocco and Germany reinforced their growing partnership during high-level talks in Rabat, placing energy transition and green investment at the center of their expanding cooperation. The latest report from the International Renewable Energy Agency (Irena) confirms that renewables, driven by solar and wind, now surpass fossil fuels in competitiveness, and this is sustainable. This two-day workshop will bring together. This report aims to provide comprehensive insight into the evolution of Morocco's energy policy and to identify the key factors influencing and driving it. The Minister was accompanied.
