

Rare earth perovskite solar cells

Overview

Organic-inorganic lead halide based perovskite solar cell has received broad interest due to their merits of low cost, a low temperature solution process, and high power conversion efficiency. Rare earth ion dope. ••This review summarizes the application of rare earth material in solar. Due to the continuous progress of human civilization, energy shortage and environmental contamination have posed increasingly serious challenges and become urgent p. 2.1. The structure of perovskite solar cellMetal halide perovskite has a typical ABX_3 structure, in which A means a monovalent cation, B represents a divalent metal cation and X indicates. Organic-inorganic lead halide-based PSC is widely approved because of superior performance in low-cost preparation, low-temperature solution process, and high energy conversio. With the increasingly prominent environmental problems, the development and utilization of renewable energy is particularly important to solve the problems. Perovskite solar.

Article Content

Recent Advances of Rare-Earth Ion Doped Luminescent

Rare-earth (RE) ion doped nanomaterials can be used in perovskite solar cells to expand the range of absorption spectra and improve the stability due to its upconversion and downconversion effect. This article reviews recent progress in using RE-ion-doped nanomaterials in mesoporous electrodes, perovskite active layers, and as an external function layer of ...

Rare-earth-containing perovskite nanomaterials: design, synthesis ...

Rare-earth-containing perovskite nanomaterials: design, synthesis, properties and applications . Zhichao Zeng, a Yueshan Xu, a Zheshan Zhang, a Zhansheng Gao, a Meng Luo, a Zongyou Yin, b Chao Zhang, a Jun Xu, a Bolong Huang, * c Feng Luo, a Yaping Du * a and Chunhua Yan ade Author affiliations * Corresponding authors a Tianjin Key Lab for Rare Earth Materials and ...

Efficient rare earth co-doped TiO₂ electron transport layer for high ...

Perovskite solar cells (PSCs) had received great attention as a result of their recent rapid increasing efficiency. However, the stability of PSCs is still a challenge due to the degradation of the perovskite layer caused by the high-energy ultraviolet (UV) irradiation. Inspired by the luminescent down converting ability for UV blocking and conversion as well as energy transfer ...

Enhanced Performance for Planar Perovskite Solar Cells with ...

The tactics of ion doping in metal oxide is normally used to improve the film quality, achieve an appropriate energy band, and enhance carrier mobility. Here, a rare earth element (samarium) was doped into TiO₂ compact electron transport layers (ETLs) by adding samarium trinitrate into the titanium precursor solution. The results show that perovskite solar ...

Recent advances and emerging trends of rare-earth-ion doped ...

Perovskite solar cells were fabricated using heterojunction architecture (FTO/(Er³⁺@TNPs)/CH₃NH₃SnI₃/HfO₂/spiro-MeOTAD/graphite) to achieve PCE exceeding 11%, ...

Rare earth doping in perovskite luminescent ...

Rare earth (RE) ions exhibit unique electronic and optical properties; the combination of lead halide perovskite and RE ions can combine the excellent optoelectronic properties of the host with the f-f electronic transitions of the ...

Applications and functions of rare-earth ions in perovskite solar ...

The functions of the rare-earth ions in perovskite solar cells can be understood from the following aspects: (1) optimizing charge transport layers with reduced defect states, ...

Tuning the performance of PSCs using rare-earth elements

Perovskite solar cells (PSCs) are emerging and promising alternatives to the market-leading solar cells due to their high performance, low fabrication cost, and versatile ...

Recent Advances of Rare-Earth Ion Doped Luminescent ...

DOI: 10.3390/nano8010043 Corpus ID: 3366368; Recent Advances of Rare-Earth Ion Doped Luminescent Nanomaterials in Perovskite Solar Cells

@article{Qiao2018RecentAO, title={Recent Advances of Rare-Earth Ion Doped Luminescent Nanomaterials in Perovskite Solar Cells}, author={Yu Qiao and Shuhan Li and Wenhui Liu and Meiqing Ran and Haifei Lu and ...

An overview of rare earth coupled lead halide perovskite and its ...

Since the initial application in solar cells by Kojima et al. in 2009 , organic-inorganic lead halide perovskites have become the star materials in the photovoltaic field during the past years. With the unique optoelectronic properties and low-cost solution process ability , , , perovskites are found to be an outstanding candidate for a lot of applications, ...

Application of upconversion photoluminescent materials in perovskite ...

Perovskite solar cells (PSCs) have attracted tremendous attention due to their superior properties [1, 2] of low cost, ... The UC process always happens in fluoride phosphors doped with rare-earth ions as sensitizers , which have electronic transitions of 4f-4f and 4f-5d. Because the 5s and 5p orbitals of rare earth ions are completely filled, shielding the unfilled 4f ...

Rare earth element-doped SnO₂ for enhancing the efficiency and ...

Rare earth element-doped SnO₂ for enhancing the efficiency and stability of Cs₂AgBiBr₆ lead-free perovskite solar cells Author links open overlay panel Huanyi Zhou 1, Yunfan Yang 1, Xinrui Li, Shan Wu, Jiangying Lu, Suxin Zhao, Dongqi Wu, Wenqi Xu, Peican Chen, Liya Zhou

Recent Advances of Rare-Earth Ion Doped ...

Rare-earth (RE) ion doped nanomaterials can be used in perovskite solar cells to expand the range of absorption spectra and improve the stability due to its upconversion and downconversion effect. This article reviews recent progress ...

Cerium rare-earth ions reinforced built-in electric field to enable ...

Here, the rare earth metal chloride CeCl_3 is introduced into perovskite solution to passivate the defects, where the Pb^{2+} part of the B position is replaced by Ce^{3+} . The ...

Recent advances and emerging trends of rare-earth-ion doped ...

Organic-inorganic lead halide based perovskite solar cells (PSCs) have attracted unprecedented research interest over last decade. The high performance, combined with merits of low fabrication costs and ease of synthesis make PSCs promising alternate to state of the art silicon (Si) based solar cells. However, some inherent shortcomings of PSCs are ...

Efficient Rare Earth Co-doped TiO_2 Electron Transport Layer for ...

Request PDF | Efficient Rare Earth Co-doped TiO_2 Electron Transport Layer for High-Performance Perovskite Solar Cells | Perovskite solar cells (PSCs) had received great attention as a result of ...

The Applications and Functions of Rare-Earth Ions in Perovskite Solar Cells

The emerging perovskite solar cells have been recognized as one of the most promising new-generation photovoltaic technologies owing to their potential of high efficiency and low production cost.

Efficient rare earth co-doped TiO_2 electron transport layer for high ...

Efficient rare earth co-doped TiO_2 electron transport layer for high-performance perovskite solar cells Author links open overlay panel Boxue Zhang a b, Zonglong Song a, Junjie Jin a, Wenbo Bi a, Hao Li a, Cong Chen a, Qilin Dai c, Lin Xu a, Hongwei Song a

Review for Rare-Earth-Modified Perovskite Materials and ...

For rare-earth-based up-conversion materials used in perovskite solar cells, the hosts of Ln^{3+} ions, including single crystals of NaYF_4 and various core-shell structures, can ...

Recent Progress of Rare Earth Conversion Material in Perovskite Solar ...

Rare-earth (RE) ion doped nanomaterials can be used in perovskite solar cells to expand the range of absorption spectra and improve the stability due to its upconversion and downconversion ...

Downconversion Materials for Perovskite Solar Cells

In PSCs, the absorption region covers the wavelength range from ≈ 300 to 850 nm, whereas the peak absorption intensity varies as per perovskite layer compositions. [1] For example, in a $\text{CH}_3\text{NH}_3\text{PbI}_3$ perovskite layer, the estimated absorption coefficient is 1.5×10^4 and $0.5 \times 10^4 \text{ cm}^{-1}$ at 550 and 700 nm, respectively. [2] Moreover, the mixed-halide perovskite films have shown ...

Applications and functions of rare-earth ions in perovskite solar cells

Herein, the recent progress of the application of rare-earth ions and their functions in perovskite solar cells were systematically reviewed. As it was revealed that the rare-earth ions can be ...

A Comprehensive Review on Mechanisms and Applications of Rare-Earth ...

Comprehensive Summary. Rare earth (RE) ions, with abundant 4f energy level and unique electronic arrangement, are considered as substitutes for Pb 2+ in perovskite nanocrystals (PNCs), allowing for partial or complete replacement of lead and minimizing environmental impact. This review provides a comprehensive overview of the characteristics of ...

Perovskite Solar Cells: Challenges Facing Polymeric Hole ...

Poly[bis(4-phenyl) (2,4,6-trimethylphenyl) amine] (PTAA) based p-i-n perovskite solar cells exhibit promising power conversion efficiency (PCE), but wettability, dopant, and cost challenges necessitate the development of advanced next-generation P-HSMs. To provide a clear understanding of the structural property with photovoltaic performance, this ...

Review for Rare-Earth-Modified Perovskite Materials ...

In this article, we review the applications of rare-earth metals in the perovskite photoelectric devices from the following parts: Firstly, Ln 3+ ions can be doped as up-conversion of down-conversion materials, which can ...

Recent Advances of Rare-Earth Ion Doped Luminescent ...

Organic-inorganic lead halide based perovskite solar cells have received broad interest due to their merits of low fabrication cost, a low temperature solution process, and high energy conversion efficiencies. Rare-earth (RE) ion doped nanomaterials can be used in perovskite solar cells to expand the range of absorption spectra and improve the stability due to its ...

Enhanced Performance for Planar Perovskite Solar Cells with Samarium ...

Therefore, the incorporation of rare-earth elements into the perovskite solar cells have demonstrated promising potentials to simultaneously boost the device efficiency and stability. View Show ...

High-Performance and Hysteresis-Free Perovskite Solar Cells ...

Research Article High-Performance and Hysteresis-Free Perovskite Solar Cells Based on Rare-Earth-Doped SnO₂ Mesoporous Scaffold Qiyao Guo,¹ Jihuai Wu,¹ Yuqian Yang,¹ Xuping Liu,¹ Zhang Lan,¹ Jianming Lin,¹ Miaoliang Huang,¹ Yuelin Wei,¹ Jia Dong,² Jinbiao Jia,² and Yunfang Huang^{1,3} ¹Engineering Research Center of Environment-Friendly ...

Rare earth doping in perovskite luminescent ...

All-inorganic perovskite solar cells. Organic-inorganic lead halide perovskites (OLHPs) face a challenge of long-term stability due to the large cations (MA⁺, FA⁺), and cesium (Cs⁺) was found more suitable for the structure of perovskite. ...

(PDF) Recent advances in plasmonic metal and rare-earth ...

Organic-inorganic lead halide based perovskite solar cells are considered as one of the most promising third generation photovoltaic technologies, since within a few years of focused research ...

Recent progress of rare earth conversion material in perovskite ...

Organic-inorganic lead halide based perovskite solar cell has received broad interest due to their merits of low cost, a low temperature solution process, and high power ...

Cerium rare-earth ions reinforced built-in electric field to enable ...

Perovskite solar cells prepared by inorganic-organic three-dimensional hybrid have good power conversion efficiency, but their operational stability remains a major challenge for commercialization. The defect of perovskite is an important factor restricting its charge dynamics and stability. Here, the rare earth metal chloride CeCl₃ is introduced into perovskite ...

Chalcogenides in Perovskite Solar Cells with a Carbon Electrode: ...

Perovskite solar cells (PSCs) have been on the forefront of advanced research for over a decade, achieving constantly increasing power conversion efficiencies (PCEs), while their route towards commercialization is currently under intensive progress. Towards this target, there has been a turn to PSCs that employ a carbon electrode (C-PSCs) for the elimination of ...

Rare earth element-doped SnO₂ for enhancing the efficiency and ...

Further, the fabricated perovskite solar cells showcased better performance with xPr³⁺:TiO₂ ETLs and the maximum efficiency of ~1.25 % was obtained for TiO₂: 0.07 Pr³⁺. Pioneering sustainable energy solutions with rare-earth nanomaterials: Exploring pathways for energy conversion and storage . 2024, International Journal of Hydrogen Energy. Show ...

Wide spectral response perovskite solar cells mixed with ...

In this paper, we study the effect of TiO₂ mesoporous layer mixed by NaGdF₄:Yb³⁺,Er³⁺ @ NaGdF₄:Eu³⁺ core-shell rare earth particles with up-conversion luminescence and down-conversion luminescence in parallel on hole-conductor-free perovskite solar cells based on carbon counter electrodes.. •The aim is to broaden the spectral response range of the cell ...

Boosting interfacial charge transfer by constructing rare earth...

Herein, we use the rare earth (RE)-doped WO₃ nanorods/SnO₂ hybrid films as the electron transport layer (ETL) to accurately modulate the interfacial charge dynamics for hysteresis-free, high-performance devices. The RE-WO₃ nanorods with SnO₂ can improve the perovskite crystal quality and hinder electron-hole recombination by reducing the interface ...

Rare earth (Sm/Eu/Tm) doped ZrO₂ driven electro-catalysis, ...

Rare earth (Sm/Eu/Tm) doped ZrO₂ driven electro-catalysis, energy storage, and scaffolding in high-performance perovskite solar cells Author links open overlay panel Shaan Bibi Jaffri a, Khuram Shahzad Ahmad a, Isaac Abrahams b, Christina J. Kousseff b, Christian B. Nielsen b, Bader O. Almutairi c

Rare earth ions doped NiO_x hole transport layer for efficient and ...

Rare earth ions doped NiO_x hole transport layer for efficient and stable inverted perovskite solar cells Author links open overlay panel Xinfu Chen, Lin Xu, Cong Chen, Yanjie Wu, Wenbo Bi, Zonglong Song, Xinmeng Zhuang, Shuo Yang, Shidong Zhu, ...
