

Solar Retrofit Container

Overview

These kits typically include solar panels, inverters, battery storage, and mounting systems, all designed to fit seamlessly into container structures. The process begins with selecting a suitable container, often a 20 or 40-foot unit, which provides ample space for solar. In recent years, the demand for sustainable energy solutions has surged, leading to innovative approaches like converting standard shipping containers into solar hubs. Pre-assembled for mining, emergency, eco-tourism, and off-grid use — enabling rapid deployment, CE/IP65 protection, and up to 80% fuel savings. Our. We make mobile solar containers easy to transport, install and use. That is why we have developed a mobile photovoltaic system with the aim of achieving maximum use of solar. RPS supplies the shipping container, solar, inverter, GEL or LiFePo battery bank, panel mounting, fully framed windows, insulation, door, exterior + interior paint, flooring, overhead lighting, mini-split + more customizations! RPS can customize the Barebones and Move-In Ready options to any design. Turn your container roof into a power station - without welding, cutting, or complicated installs! Our solar panel mounting kits are designed specifically for shipping containers.
