

Telecom site cabinet IP55 rating

Overview

The IP55 Rating classification defines outdoor enclosures engineered for superior protection against dust and low-pressure water jets from any direction. This rating ensures that equipment inside remains fully operational under moderate to heavy rain, wind-driven dust, and humid. An IP55 Outdoor Telecom Cabinet is a rugged, weather-resistant enclosure designed to protect telecommunications and networking equipment in outdoor environments. Many people just skip it, but it's actually very important. Sometimes you see IP55, other times IP66. But what's the real difference?

And where do these numbers really come from?

Let's talk in a. In this article, we explain what an IP55 rating is, how protection against dust and water is achieved, and which design features allow an IP55 enclosure to withstand outdoor and industrial environments. We will also clarify when IP55 is sufficient — and in which cases you may need to consider a. The IP (Ingress Protection) rating is defined by the international standard IEC 60529.
