

Telecom solar system project duration Bangladesh

Overview

This impressive project reached completion in January 2023 and is seamlessly integrated into the national grid. Bangladeshi telco Robi Axiata has signed a Memorandum of Understanding (MoU) with two renewable energy companies to develop a 100MW solar project to power its operations in the country. The collaboration aims to cut carbon emissions and lower operational costs by deploying solar hybrid power. Electricity Generation Company of Bangladesh (EGCB) has reached the advanced stages of constructing a solar power plant in Sonagazi, Feni, initially planned for a 50MW capacity but subsequently upgraded to produce 100MW of power. Bangladesh's energy sector is undergoing a rapid transformation. Bangladesh government has already made a master plan to utilize the abundant solar energy in different ways with a capacity development target of 600 MW by the end of 2021. Until 2018 a total capacity of 220 MW of solar power could be achieved by installing 6.
