

Unit power generation cost of photovoltaic panels

Overview

Average price of solar modules, expressed in US dollars per watt, adjusted for inflation. Data source: IRENA (2025); Nemet (2009); Farmer and Lafond (2016) – Learn more about this data Note: Costs are expressed in constant 2024 US\$ per watt. Global estimates are used before 2010; European market. Each year, the U. Department of Energy (DOE) Solar Energy Technologies Office (SETO) and its national laboratory partners analyze cost data for U. solar photovoltaic (PV) systems to develop cost benchmarks. These benchmarks help measure progress toward goals for reducing solar electricity costs. This dashboard provides an overview on the latest Solar PV costs. Costs of renewable energy, especially solar photovoltaic (solar panels), have declined significantly, with 62% of total renewable power generation. Estimates the energy production and cost of energy of grid-connected photovoltaic (PV) energy systems throughout the world. – that's 50% cheaper than a decade ago! But why does your neighbor's quote look different?

Three key factors: Data sources: SEIA 2023 Report, German.
