

Vanuatu New Energy Base Station

Overview

VANUATU's Green Transformation Project is making steady progress as engineers begin construction on a new hybrid solar and pico-hydro power station in the remote village of Nambwarangiut, bringing reliable electricity to nearly 700 residents for the first time. The \$USD1 million project, funded by. On Pentecost Island, the sound of flowing rivers is increasingly correlating to the light of reliable, renewable electricity. Ralph Regenvanu, minister of Climate Change Adaptation, said the launch. Waterfall and Melsisi, Pentecost Island, Vanuatu — The Government of Vanuatu, together with the Ambassador of Japan to Vanuatu and the United Nations Development Programme (UNDP), today celebrated the official launch and handover of three pico-hydro power stations in Waterfall, Melsisi and Larimaat. Three Japan-funded pico-hydropower stations at Waterfall, Melsisi and Larimaat villages on Pentecost were officially launched and handed over to the Vanuatu Government yesterday.

ONSHORE RENEWABLE ENERGY POTENTIAL INTRODUCTORY BRIEF VANUATU

JANUARY 2023 This brief highlights the existing and potential electricity generation from different onshore renewable energy sources (onshore RES) in Vanuatu given the geographic context of this

Renewable energy brings communities in Vanuatu

BRANTV is bringing renewable energy solutions to 37 communities across Vanuatu, revolutionizing the lives of more than 50,000 people. The

Vanuatu communication base station wind and solar hybrid power ...

The GSMA today announced that Digicel, supported by the GSMA Development Fund, has completed the second phase of its green power network implementation and is using wind and solar energy

Republic of Vanuatu PM breaks ground at 400-kW Brenwe

Earlier this month, the Republic of Vanuatu Prime Minister broke ground at the 400-kW Brenwe Hydropower Plant site to officially commence construction.

REnew Pacific's first clean energy projects in Vanuatu

REnew Pacific is the Australian Government's new \$75 million investment in off-grid renewable energy for rural and remote communities across the Pacific and Timor

Vanuatu edges closer to 100% renewable energy with new On-Grid ...

As part of the Government's ongoing efforts to operationalise Vanuatu's Nationally Determined Contributions (NDC), stakeholders active in the energy space convened in Port Vila to

Vanuatu builds communication base station energy storage system

About Vanuatu builds communication base station energy storage system At SolarTech Innovations, we specialize in comprehensive photovoltaic solutions including hybrid electric systems, high-efficiency

Vanuatu Business Review » Pentecost hydropower stations handed

Constructed under the UNDP Vanuatu Green Transformation Project (VGET), these small systems generate electricity from flowing water. They are now delivering reliable 24/7 electricity

ADB, Vanuatu Commission Brenwe Hydropower Plant

ADB joined the Government of Vanuatu and members of the Malekula community in commissioning the Brenwe hydropower plant and transmission and distribution line extension in

Vanuatu leads Pacific push for 100 percent renewable energy

Vanuatu is accelerating its shift towards a low-carbon future, integrating the principles of just transition into national energy and climate strategies, with a strong focus on renewable energy, green

Vanuatu Embarks On a Green Energy Revolution

The Vanuatu Green Transformation Project is part of the Pacific Green Transformation Project which is funded by the Government of Japan to support communities in Papua New Guinea, Samoa, Timor

New pico-hydro power stations bring Vanuatu closer to green energy

Vanuatu has officially commissioned three pico-hydro power stations on Pentecost Island, advancing its goal of making renewable electricity available to remote communities and

Building a Sustainable Future for Vanuatu, the Pacific

The Pacific Island nation of Vanuatu may be small in population, but its ambitious agenda in pursuit of renewable energy solutions see it punching well above its

Waterfall, Melsisi and Larimaat Pico-Hydro Power Stations on

The inauguration marks a major milestone in expanding access to clean, renewable electricity across one of Vanuatu's most remote islands. Since December 2025, when electricity was

Hybrid Power Station brings Vanuatu closer to renewable energy goal
